Any job is easier with the right equipment.

Complete, integrated Grasshopper grounds maintenance systems save you time and labor on every job. Replace expensive single-purpose equipment, eliminate the need for cumbersome auxiliary engines and simplify maintenance. Installed in minutes without tools and close-coupled to the tractor for optimal traction, visibility and maneuverability. Front-mounted Grasshopper implements fully utilize the mower's zero-turn radius agility to outperform pull-behind attachments. Best of all, every Grasshopper implement features professional-grade, heavy-duty construction that ensures powerful, trouble-free performance season after season. Implements can be fitted for use with older Grasshopper power units.

Turbine Blower – 1/4 the time. 1/4 the labor.

Clean leaves and debris from congested, hard-to-reach areas and long stretches of walkways and curbs. Finish the job in a fraction of the time required by backpack blowers and pull-behind or walk-behind blowers. Create a beautiful appearance and help keep turf healthy by removing leaf cover.

The PTO-driven, front-mounted turbine blower is quicker and more maneuverable than pull-behind blowers. There is no extra engine to service and maintain, and is significantly quieter than most debris blowers.

TURBINE BLOWER SPECIFICATIONS

Blower Order #	533226
Compatibility	700 and 900 FrontMount™ models
Directional Control	360-degree nozzle rotation from operator's seat
Electric Control/Order #	Control switch required/504800 or 605841
Total Width	35.5 in. (90.2 cm)
Height	30 in. (76.2 cm)
Length	63 in. (160.0 cm)
Weight	215 lbs. (97.5 kg)

"With one employee and a Grasshopper/turbine blower system, we completed a 26-mile curb cleaning project in four hours, when it had been taking four guys with backpack blowers almost three days (22 hours) to complete."

Scott Brewer
RCI, Slidell, LA

Optional lever-mounted joystick control (Order #504800) for the turbine blower, PowerBlade™ and bidirectional rotary broom.

Find out how our Grasshopper/Turbine Blower system saved a golf course more than \$11,000 in 12 weeks at grasshoppermower.com/turbine.

PROFESSIONAL FEATURES. Flawless performance.

LITTLE BULLY™ DOZER BLADES

These tough tools push their way through loose dirt, sand or gravel quickly and easily, with True ZeroTurn™ maneuverability to save time and labor. Our dozer blades are also great for snow removal.

Blades can be raised, lowered and lifted easily with hand or foot controls with an optional foot-controlled angling kit available; hydraulic lift and angling also available.

Optional cart (Order #503273) assists with installation and removal.

CLEANSWEEP™ ROTARY BROOMS

From dethatching yard debris in spring, to removing leaves and other debris from walks and drives in summer and fall, to clearing up to 8 inches of snow in winter, a PTO-driven rotary broom is a true all-season tool.

Wavy bristle pattern creates a side-to-side sweeping path to pick up large and small debris. When set properly, bristles do not damage turf when dethatching. Optional jack kit (Order #503303) for fixed-angle brooms speeds the mounting process.
